An Online Induction can solve all these problems

- Spending a lot of time doing inductions?
- Can't ensure everyone is properly inducted?
- Want to improve the way you collect licenses and certifications?
- Want automatic reminders on licenses and certifications?
- Want to eliminate multiple paper forms asking the same information?
- Easily want to induct mass numbers remotely, quickly and efficiently before they start at your work place?
- Want to collect identification as part of the induction?
- Want to produce reports on who has been inducted and when they are due for renewal?

Ready to go features and the ability to create your own!

An online portal to induct and communicate training material to staff, contractors and other inductee types in an online format that can be accessed externally from home, a mobile device or computer.

- Ensuring compliance with the latest OH&S / WHS laws
- Usage in different work environments
- Collecting required documentation from inductees online as part of their induction such as trade certificates, next of kin, licenses and required personal information via scan and upload
- Communicating a consistent induction message either via video, online presentation or a mixture of presentation modules
- Online assessments to test the knowledge of inductees on material
- Automatic reminders to ensure ongoing compliance requesting inductees re-submit any expiring documents or material
- Printing a certificate of completion
- Administrative tools to manage and update content and management reporting
- Automatic re-inductions to ensure ongoing compliance via a reminder email
- Contacts database
- Document library option
- Complaints / Suggestions registry
- Contractor management processes and tools for the management
- Visitor access and management option
- Customisations required to personalize the portal further in line with any specific requirements

The App - More and more people are using mobile devices as the chosen medium to connect with the Internet

Inductee doesn't have a computer?
